# FSA 300 Series

Flash SATA Disk /mSATA SATA 3 SLC,MLC

▲ mSATA /SLC(MLC)

## Introduction

Axiomtek's FSA mSATA series is designed as the standard Mini PCIe form factor with SATA interface, and support SATA III standard (6.0Gb/s) with excellent performance. The form factor refers to the MO-300 specification which established by JEDEC. Regarding of mechanical interference, the mSATA absolutely replaces the traditional hard disk and makes personal computer, in any field, smaller and easier.

The mSATA effectively reduced the booting time of operation system and the power consumption is less than hard disk drive (HDD), and complies with ATA protocol, no additional drives are required, and can be configured as a boot device or data storage device.

# FSC Series

Flash SATA CFast™ SLC ,MLC

## Introduction

Axiomtek's FSC (Flash SATA CFast) series operates at SATAIII 6.0Gb/s. Compliant with CFast™ 2.0 standard, it is designed with 7+17 pin connector and is SATA compatible. Due to the idle power saving, it reduces 30% power consumption. The FSC is featured as small form factor, and suitable for most industrial application. The FSC can work under harsh environment, and complies with ATA protocol. Without additional drives, the disk can be configured as a boot device or data storage device. The FSC support hardware write protect to prevent modification of valuable data on a device.
